RE; Bear Canyon power pole
site reclamation

Dear Mr. Helfrich;

Reclamation of the installation access to the pole located directly above the proposed location of the building for the shop and warehouse (see enclosed map) will be as follows:

A diversion ditch will be constructed along the upper side of the access which will drain into the natural drainage immediately to the North, and into the 18 inch culvert that passes under the load-out pad. The entire area will be reseeded in the late fall season that is most ideal for reseeding. Rocks will be placed in the natural drainage to restrict the flow of water to help control erosion.

Reclamation at the pole adjacent to the shop will include reseeding around the pole area. Access to this pole is through pad for the proposed shop, and is included in the disturbed area that drains into the sedimentation pond. No other access will need to be retained.

Respectfully,

Wendell Owen
